POLITEKNIK ELEKTRONIKA NEGERI SURABAYA
SURABAYA
2018**

❖ Pengerjaan Minggu ke 8 (16 - 22 Oktober 2018)

- Penentuan Timeline pengerjaan

Proses Development									
1	2	3	4	5	6	7	8	9	10
		10-16 sept	17-23 sept	24-30 sept	1-7 okt	8-14 okt	15-21 okt	22-28 okt	29 okt- 4 nov

- Pembagian pengerjaan

Game Programmer

Biru : Putra Adi Wardana
(4210161017)

Backend

Merah : Rey Alphard Savero
(4210161023)

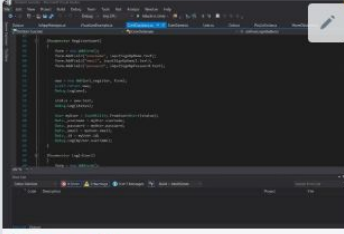

Artist& Game Designer

Hijau: Dini Ayu Tri Maryani
(4210161011)

- Yang sudah dikerjakan

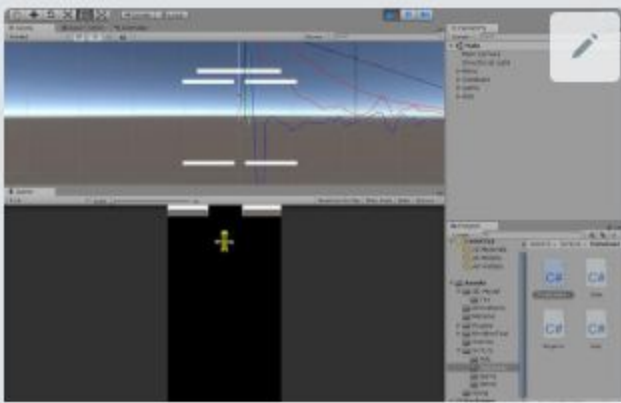

Task 5

Backend
Refractory Format JSON
🕒 Oct 23 📌 1

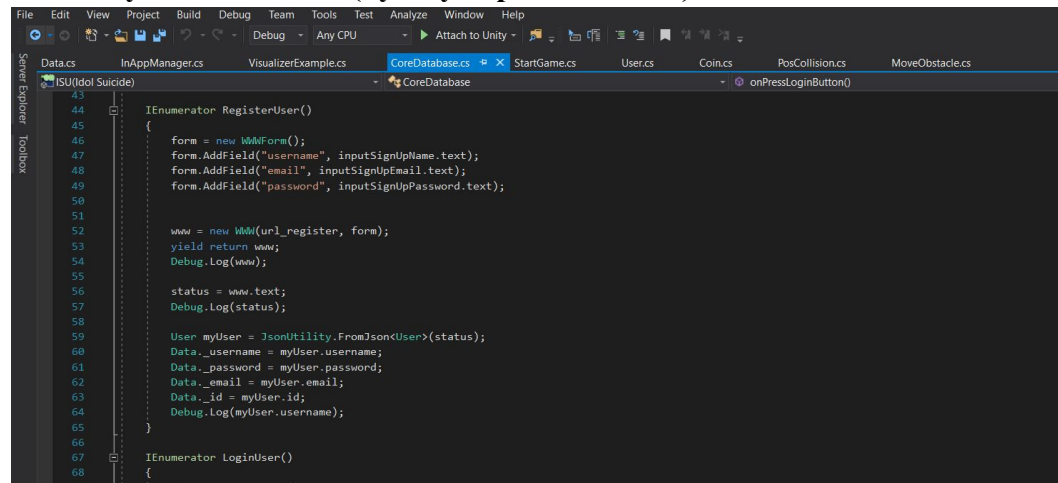

Artist& Game Designer
Make 3D avatar
🕒 Nov 6 📌 1

Game Programmer
Pre-Alpha Game ISU
🕒 Oct 23 📌 1

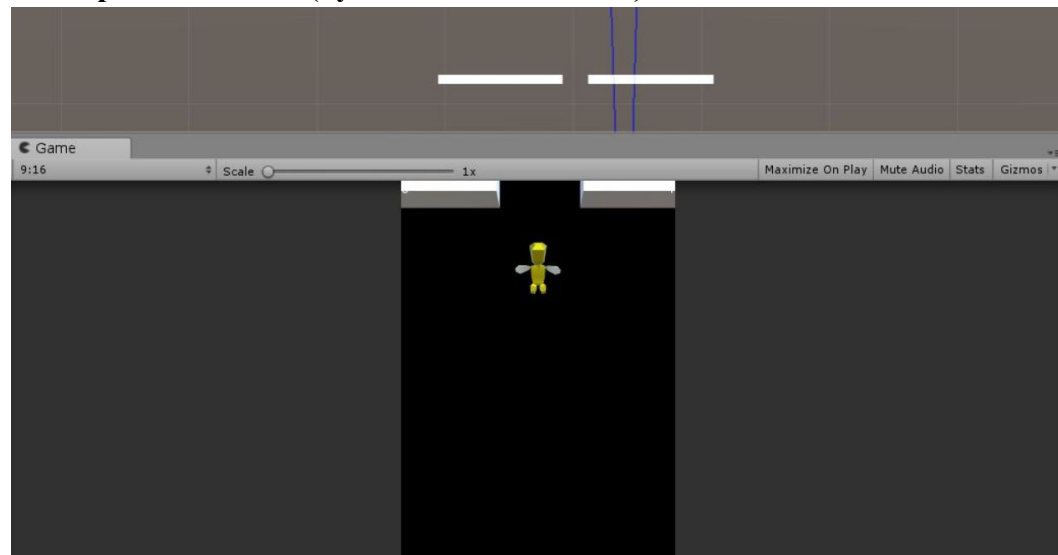

- **Refactory Format JSON (by Rey Alphard Savero)**

The screenshot shows the Visual Studio code editor with the 'CoreDatabase.cs' file open. The code is written in C# and implements two methods: 'RegisterUser()' and 'LoginUser()'. The 'RegisterUser()' method creates a 'WWWForm' object, adds fields for 'username', 'email', and 'password', and then sends a POST request to 'url_register'. It then processes the response, which is a JSON object, and saves the user data to a database. The 'LoginUser()' method is partially visible at the bottom of the code block.

```
43
44
45 IEnumerator RegisterUser()
46 {
47     form = new WWWForm();
48     form.AddField("username", inputSignUpName.text);
49     form.AddField("email", inputSignUpEmail.text);
50     form.AddField("password", inputSignUpPassword.text);
51
52     www = new WWW(url_register, form);
53     yield return www;
54     Debug.Log(www);
55
56     status = www.text;
57     Debug.Log(status);
58
59     User myUser = JsonUtility.FromJson<User>(status);
60     Data.username = myUser.username;
61     Data.password = myUser.password;
62     Data_email = myUser.email;
63     Data_id = myUser.id;
64     Debug.Log(myUser.username);
65 }
66
67 IEnumerator LoginUser()
68 {
```
